

Resume RETRIVAL

Set Mongo DB with BM25 and vector_index_resume

RAGDB	Resume_Storage	resume_vector_index	READY	View status details	vectorSearch	"embedding"	0 (0%) indexed o
RAGDB	resumes	BM25	READY	View status details	search	"certifications", "currentOrganisation", "currentTitle", "educationLevel", "email".+15 more	120 (100%) indexi
RAGDB	resumes	vector_index_resume	READY	View status details	vectorSearch	"embedding", "id", "name", "email", "phone".+14 more	120 (100%) indexi

There are 120 resumes already ingested to Mongo DB as pre-requisite

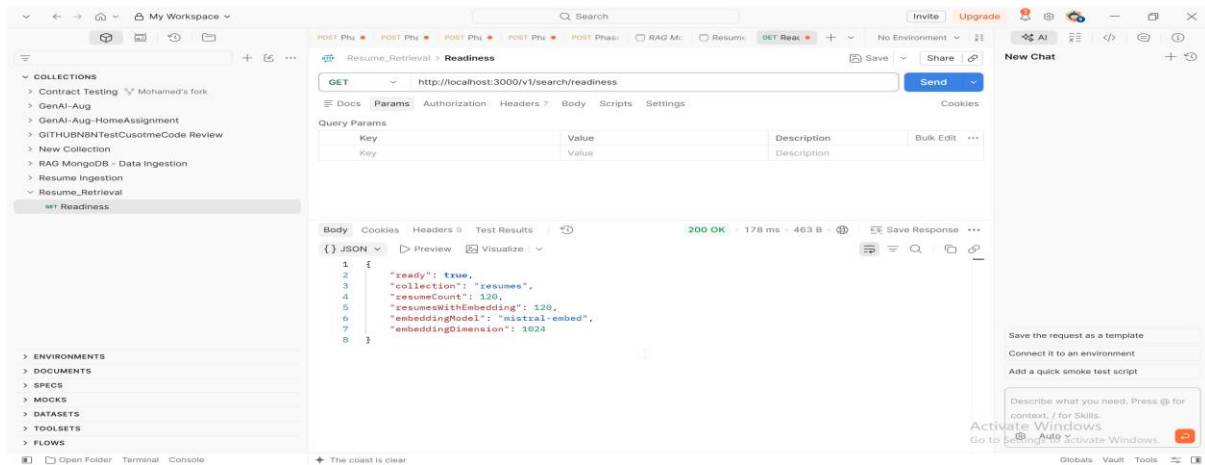

The screenshot shows the MongoDB Data Explorer interface. On the left, the 'Data Explorer' sidebar shows the 'resumes' collection under the 'RAGDB' database. The main panel displays the 'Documents' tab for the 'resumes' collection, showing 120 documents. A sample document is expanded, showing fields like `_id`, `fileName`, `sourceHash`, `rawText`, `email`, `name`, `phone`, `location`, `company`, `role`, `education`, `totalExperience`, and `relevantExperience`.

Now to the VS CODE after Ingestion, now working on the 02_Resume_Retrieval_Phasewise_Implementation 2. Md file

The screenshot shows the VS Code editor with the file `02_Resume_Retrieval_Phasewise_Implementation 2. Md` open. The file content includes configuration for Resume RAG, MongoDB URI, and embedding dimensions. A chat window on the right shows a message about saving the implementation summary.

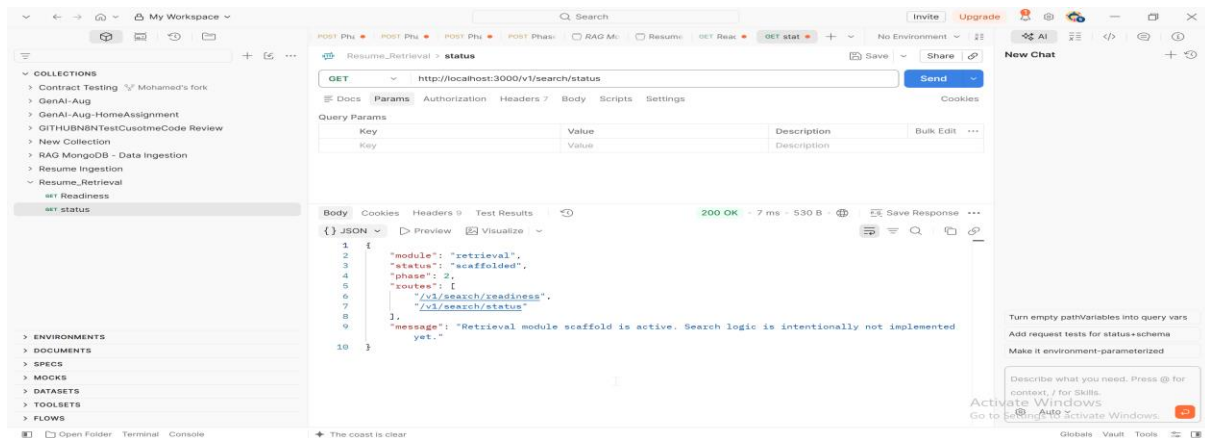

```
1  # Resume RAG
11 ## Configuration
12 root. The requested
13 folder must be inside
14 this root.
15 "MAX_BATCH_FILES" is
16 capped by the service
17 at five.

30 tral-embed
31 EMBEDDING_DIMENSION=102
32 4
33
34 Credentials must
35 remain private and
36 must not be committed
```

Phase 1 Readiness curl --location --request GET "http://localhost:3000/v1/search/readiness"

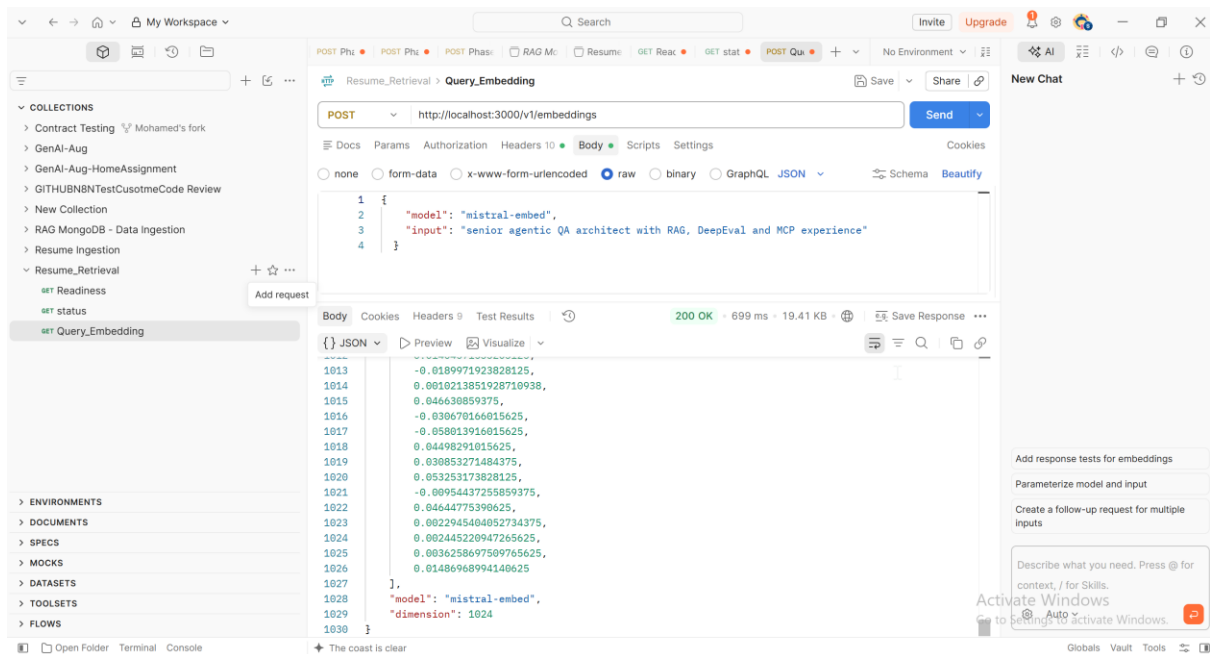

Phase 2 Status

curl --location --request GET "http://localhost:3000/v1/search/status"

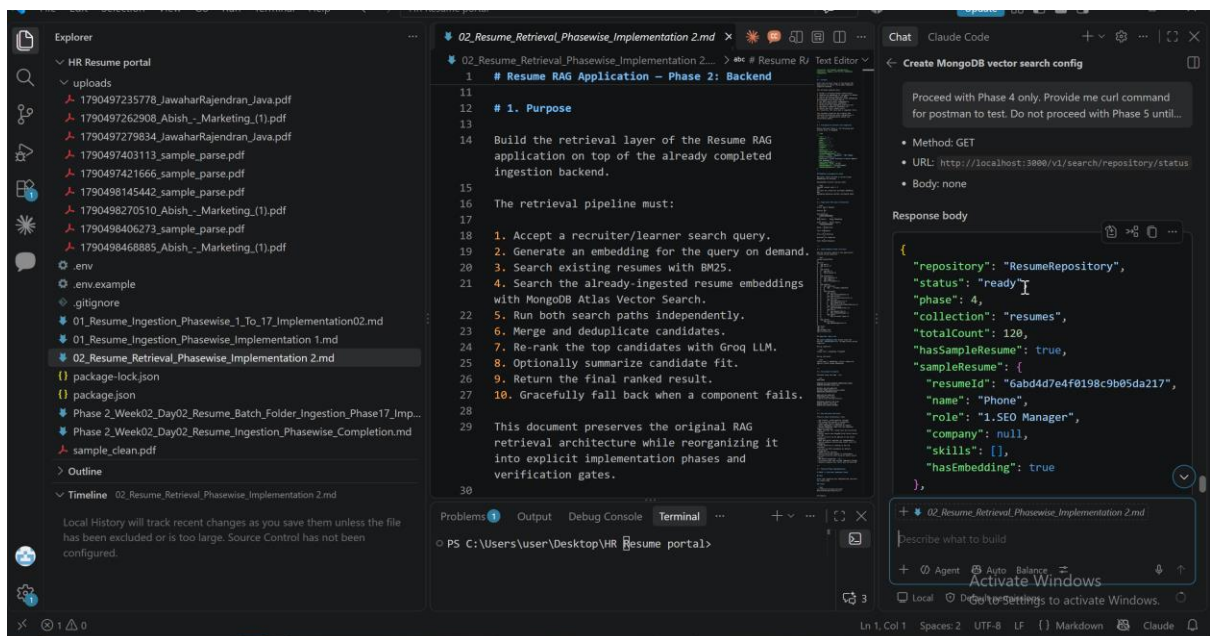

Phase 3

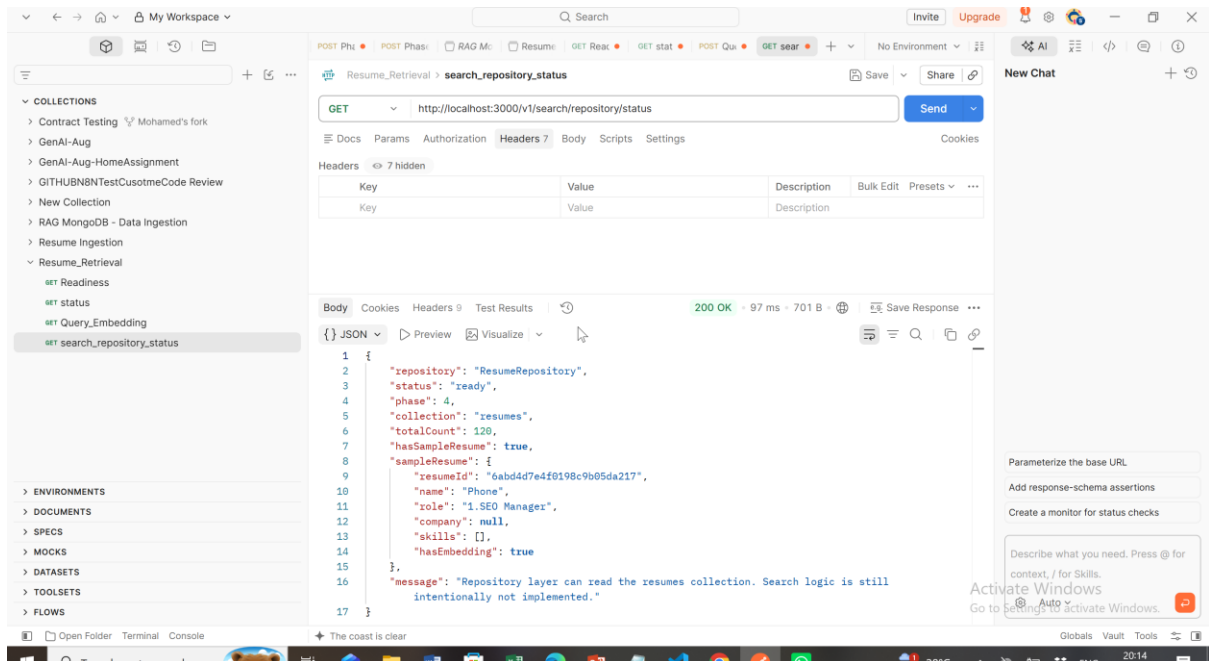

```
curl --location --request POST "http://localhost:3000/v1/embeddings" \
--header "Content-Type: application/json" \
--data-raw '{
  "model": "mistral-embed",
  "input": "senior agentic QA architect with RAG, DeepEval and MCP experience"
}'
```

Phase 4

curl --location --request GET <http://localhost:3000/v1/search/repository/status>

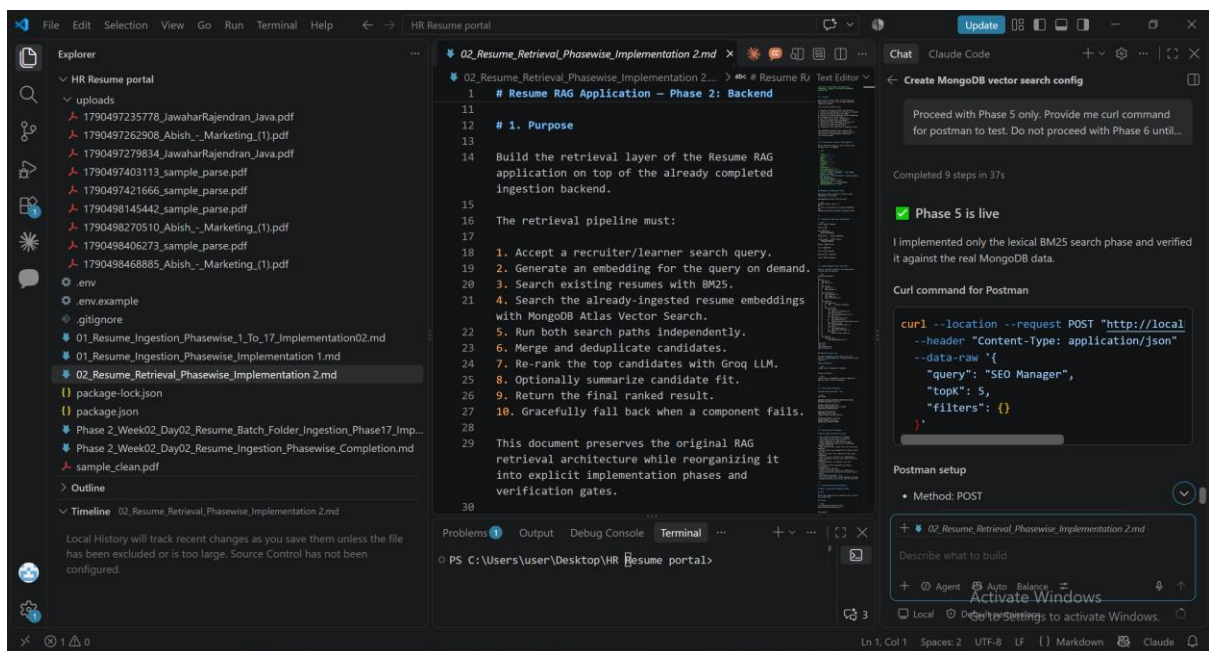

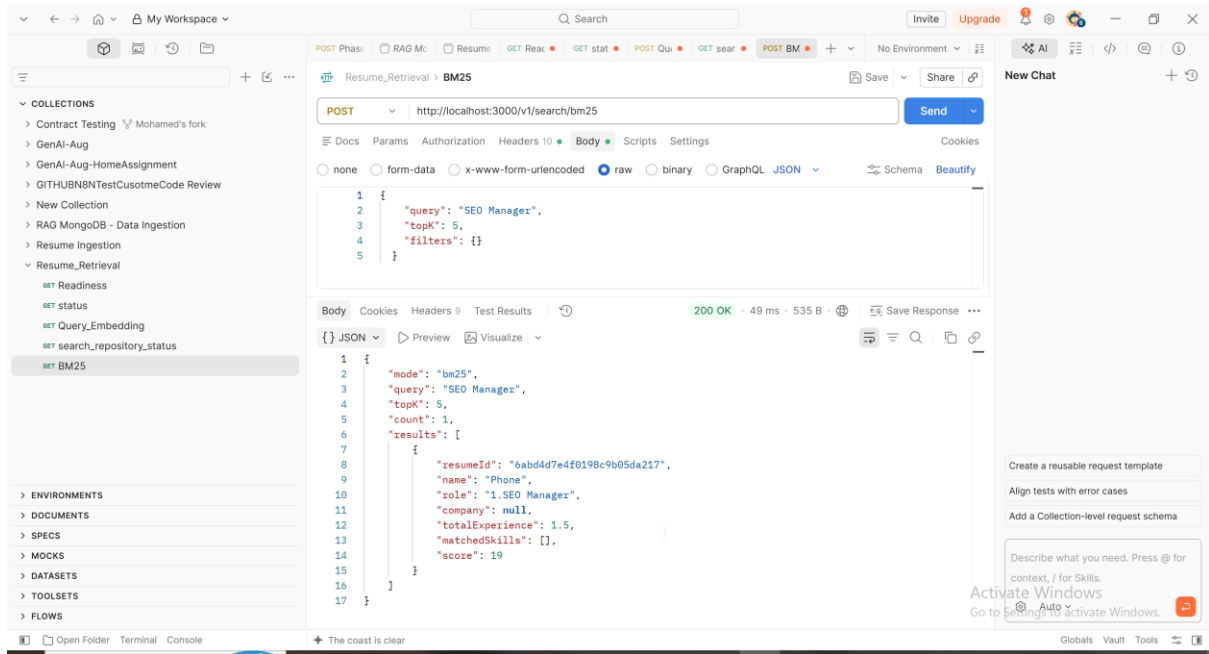

```

Phase 5 curl --location --request POST "http://localhost:3000/v1/search/bm25" \
--header "Content-Type: application/json" \
--data-raw '{
  "query": "SEO Manager",
  "topK": 5,
  "filters": {}
}'

```

Phase 6 curl --location --request POST "http://localhost:3000/v1/search/vector" \

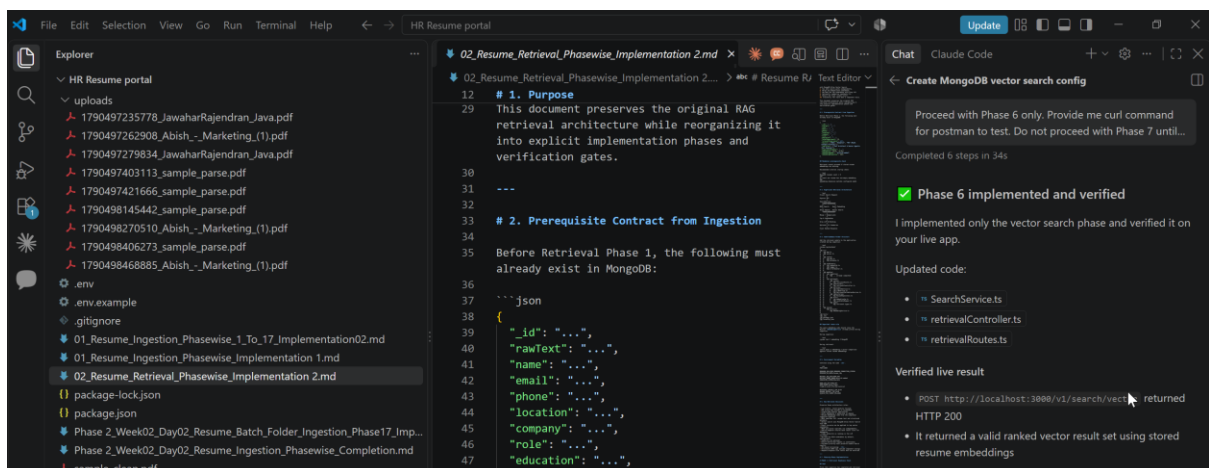

--header "Content-Type: application/json" \

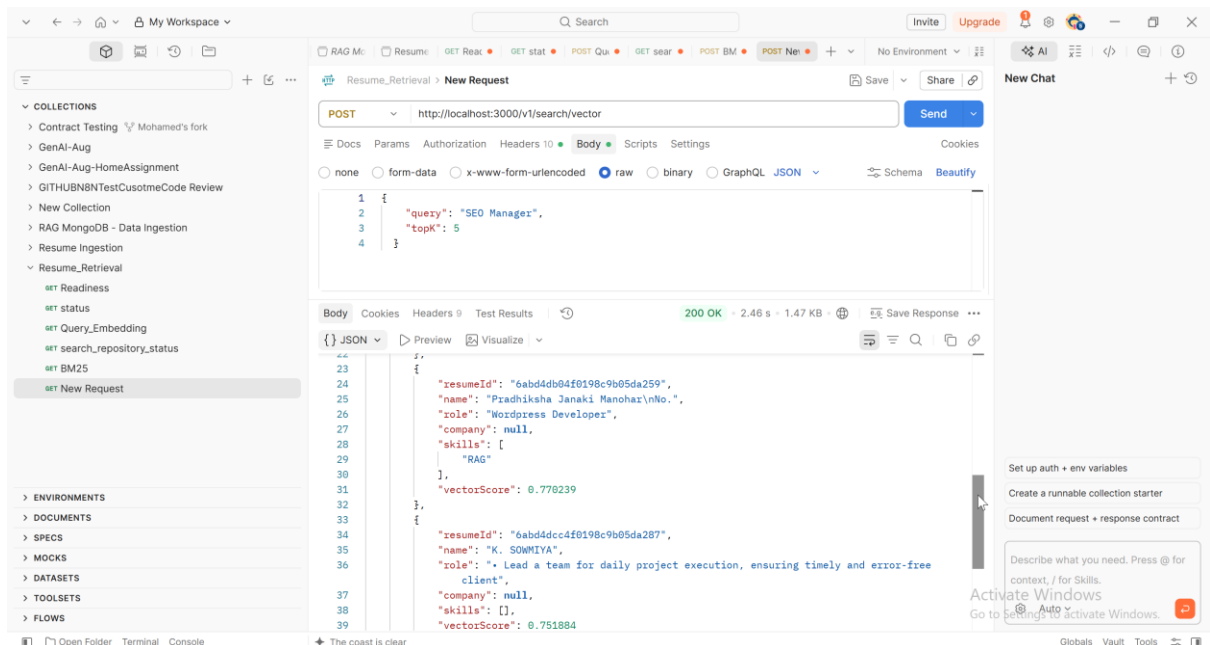

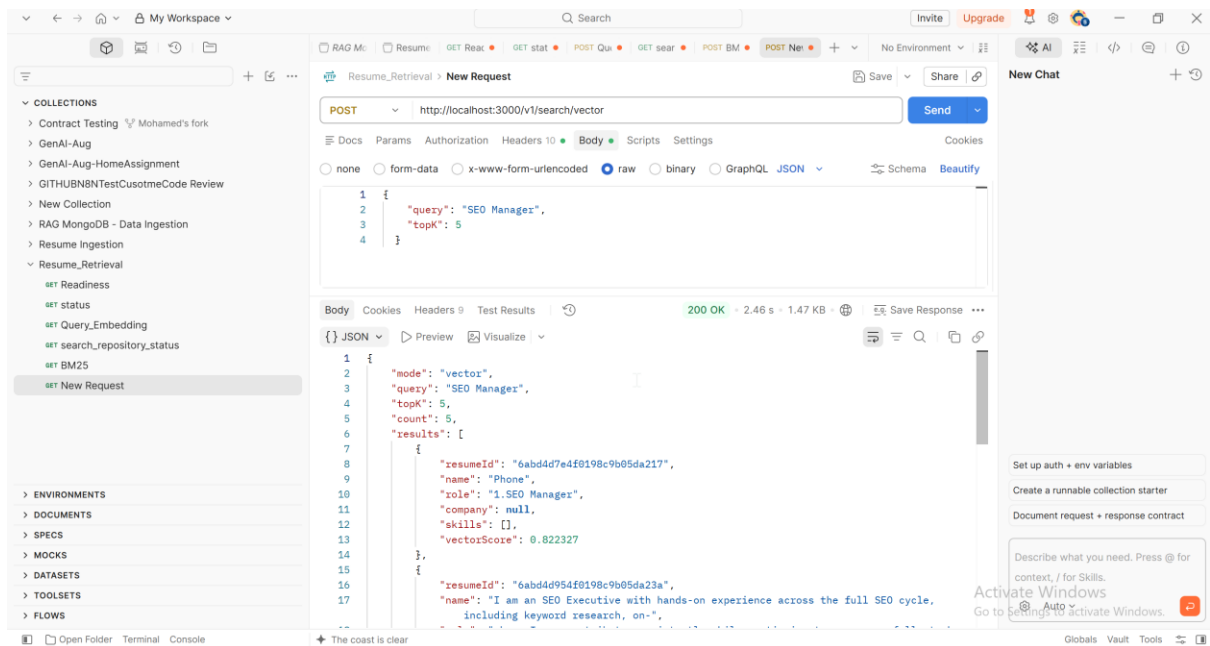

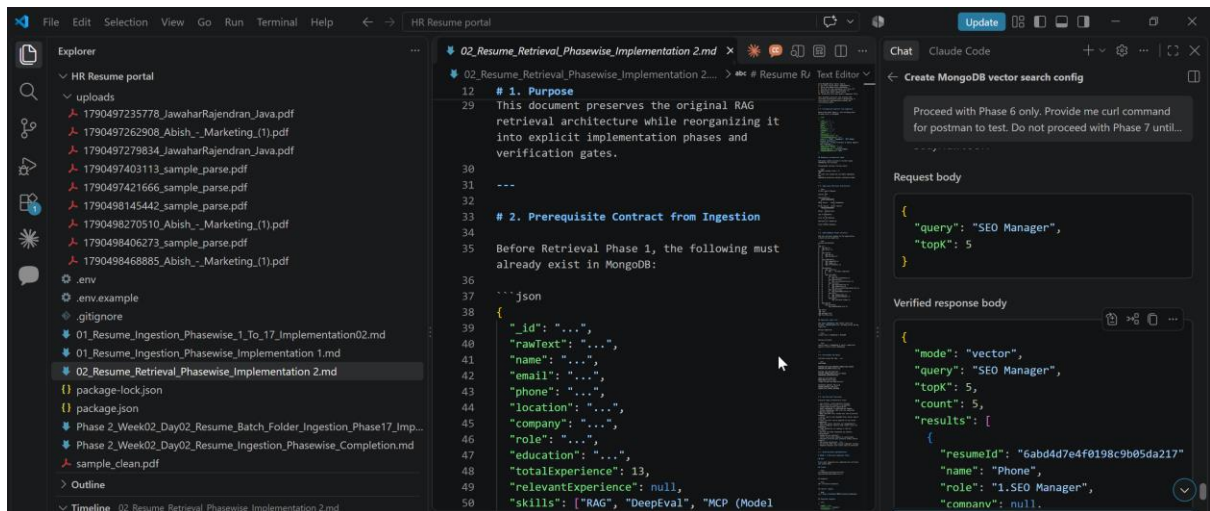

--data-raw '{

"query": "SEO Manager",

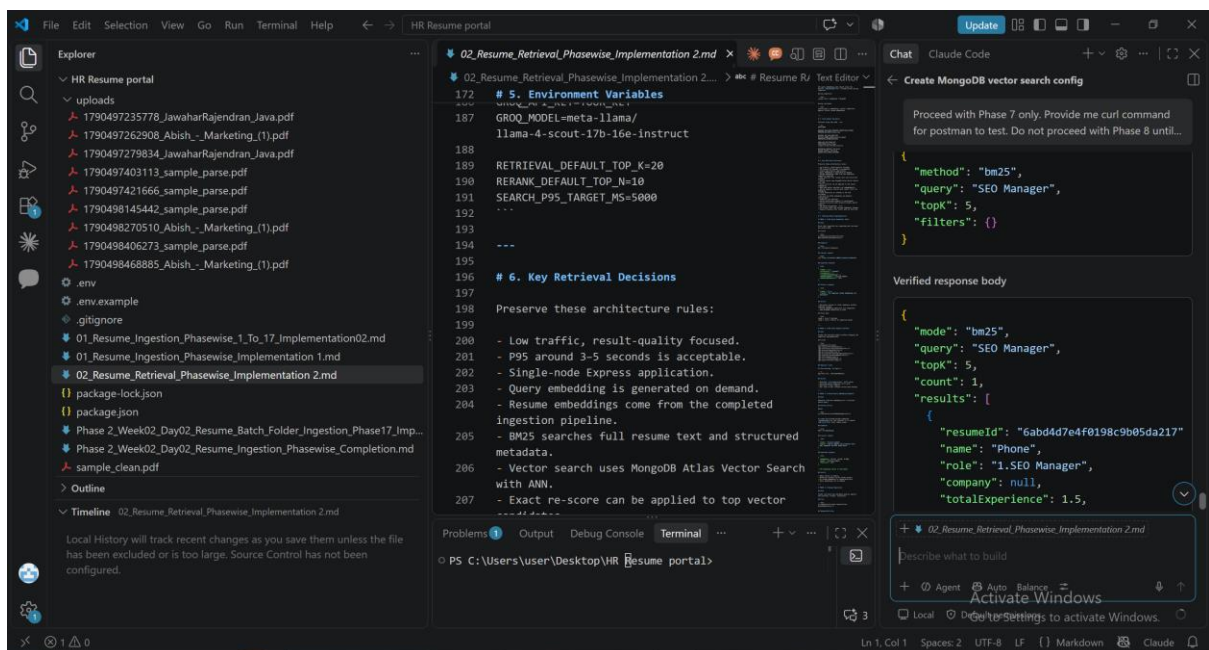

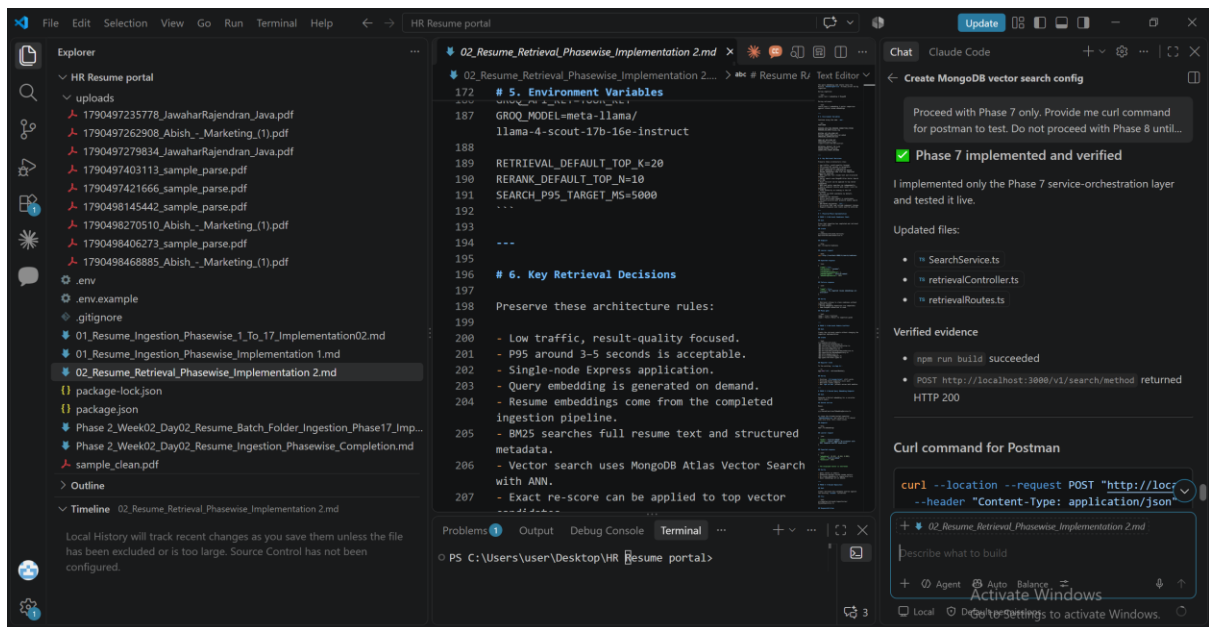

"topK": 5

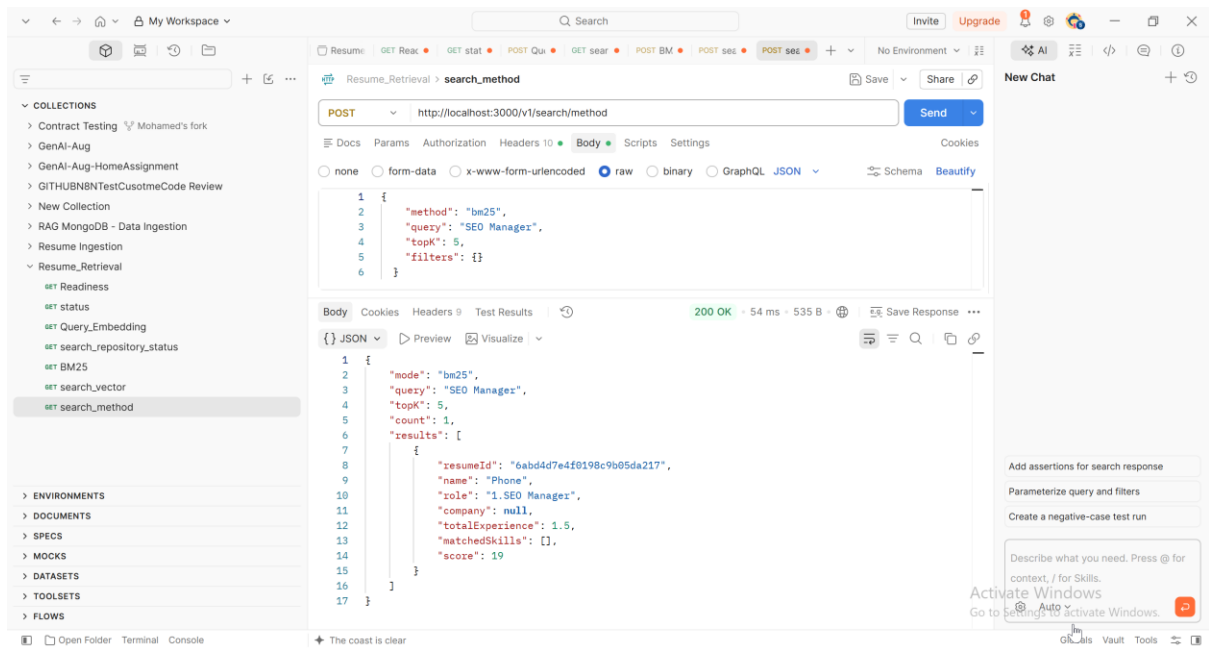

}

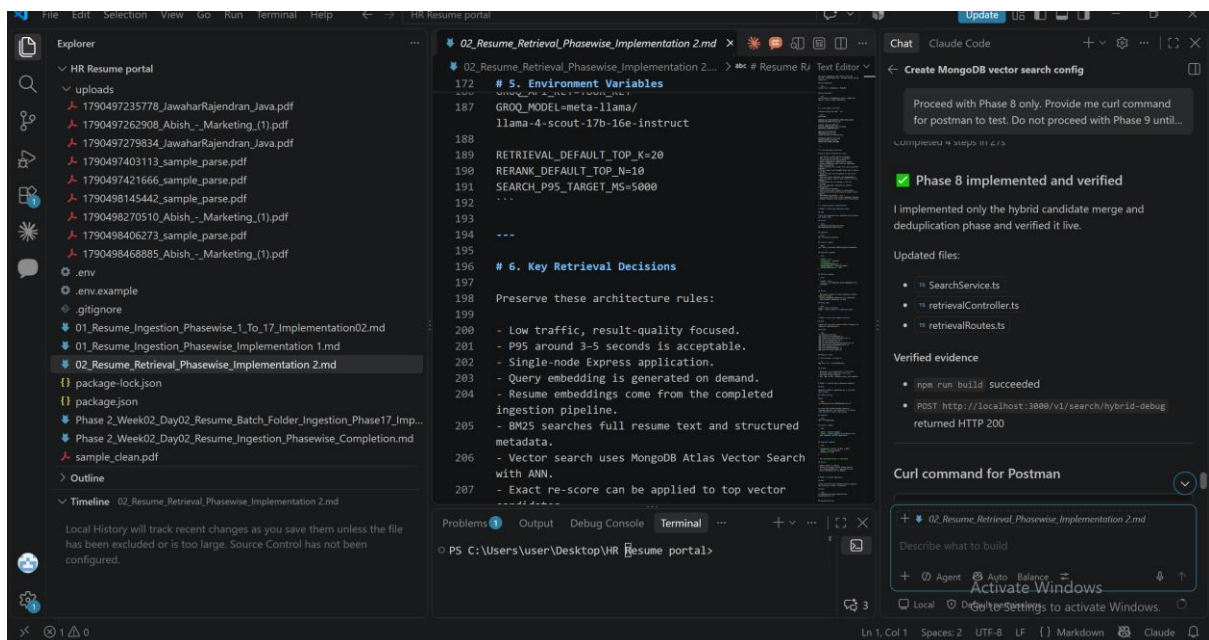

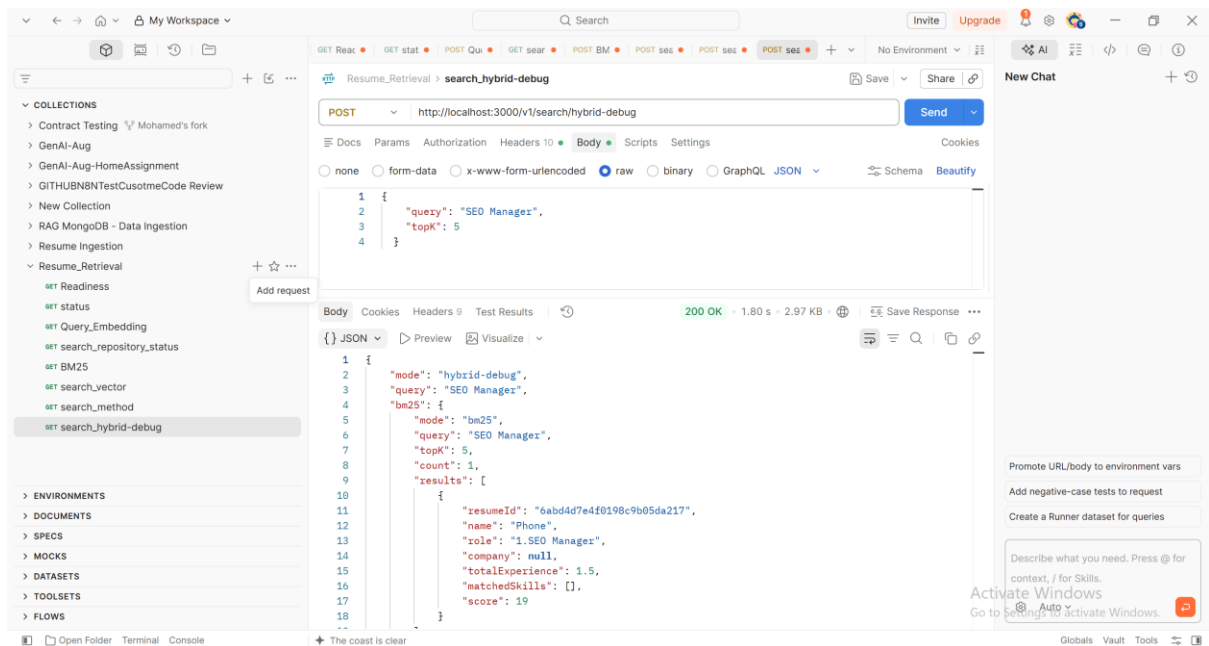

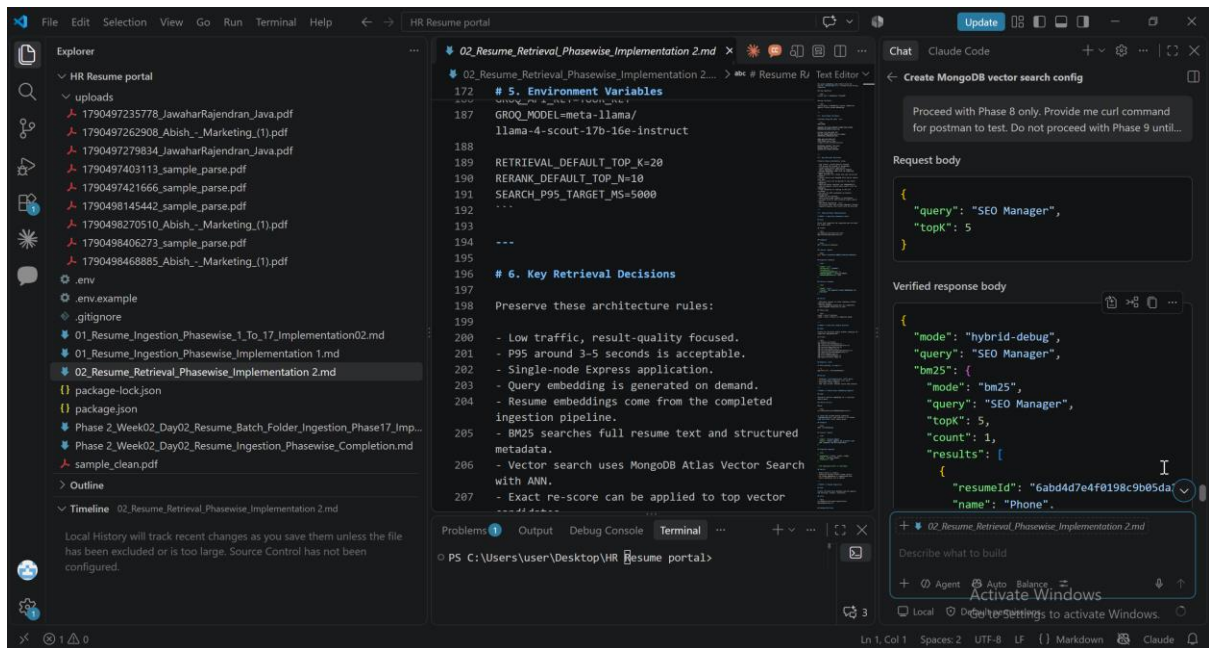

```
Phase 7 curl --location --request POST "http://localhost:3000/v1/search/method" \
--header "Content-Type: application/json" \
--data-raw '{
  "method": "bm25",
  "query": "SEO Manager",
  "topK": 5,
  "filters": {}
}'
```

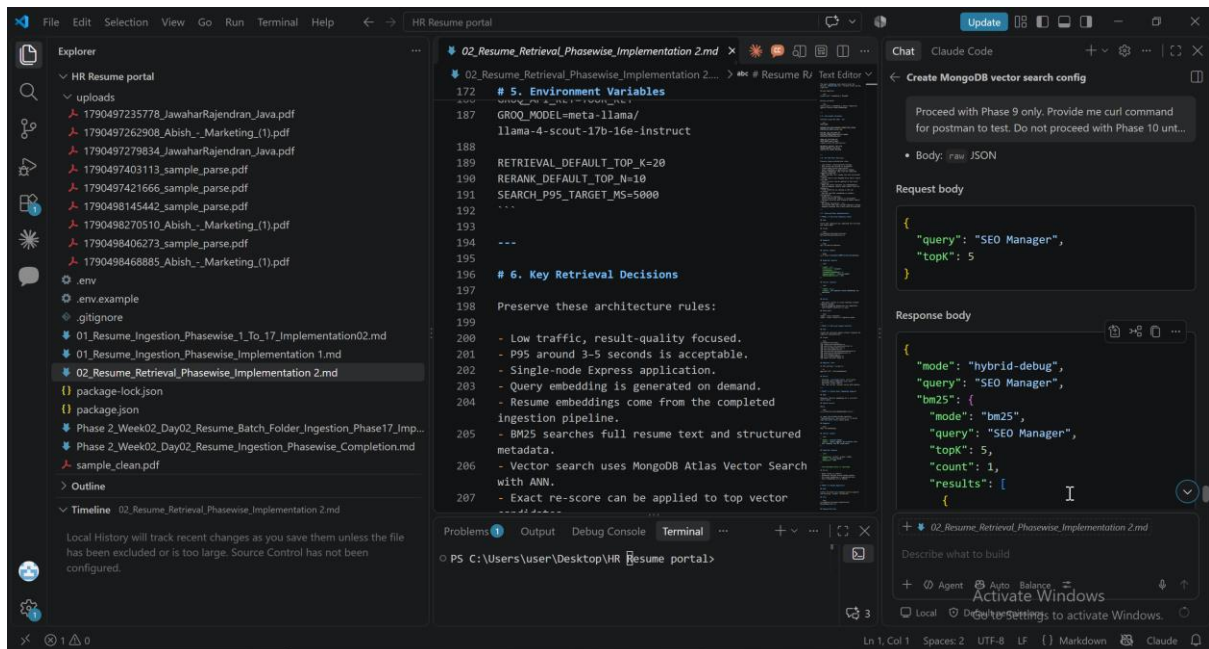

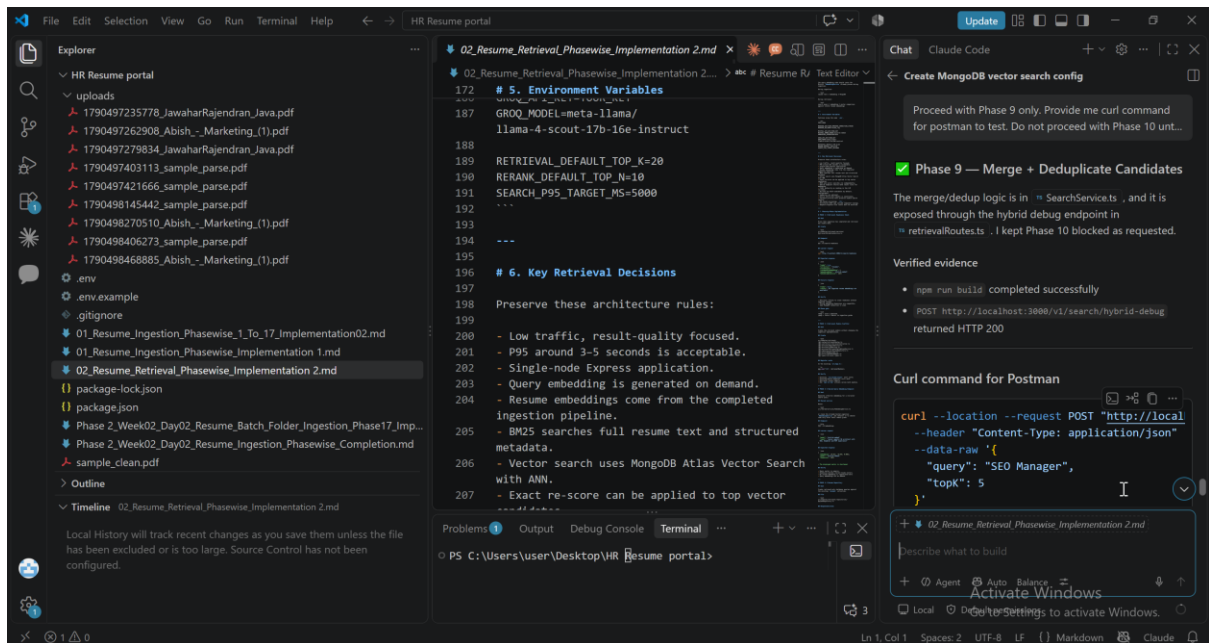

```
Phase 8 curl --location --request POST "http://localhost:3000/v1/search/hybrid-debug" \
--header "Content-Type: application/json" \
--data-raw '{
  "query": "SEO Manager",
  "topK": 5
}'
```

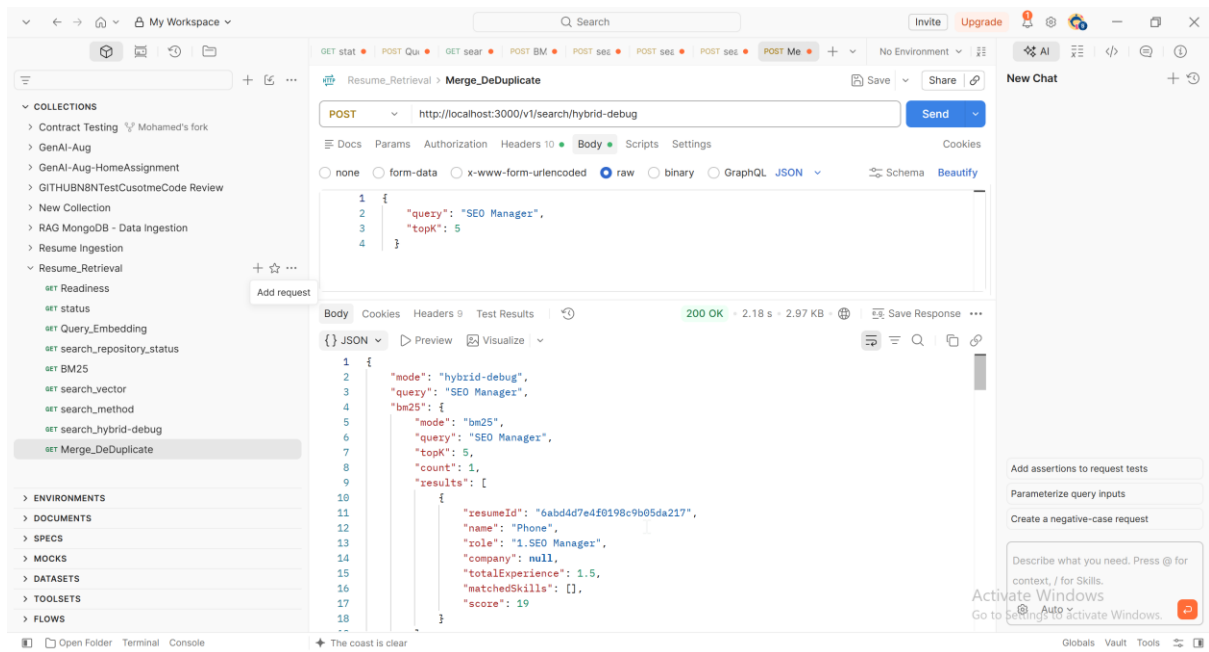

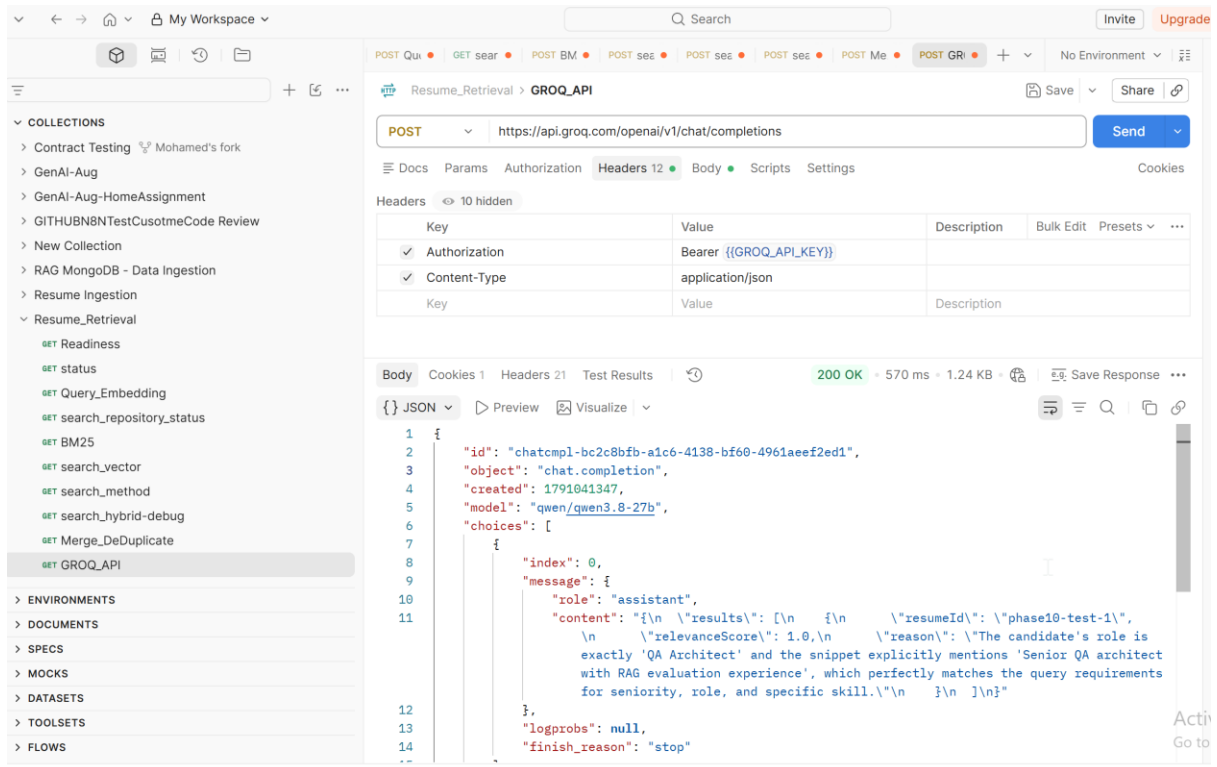

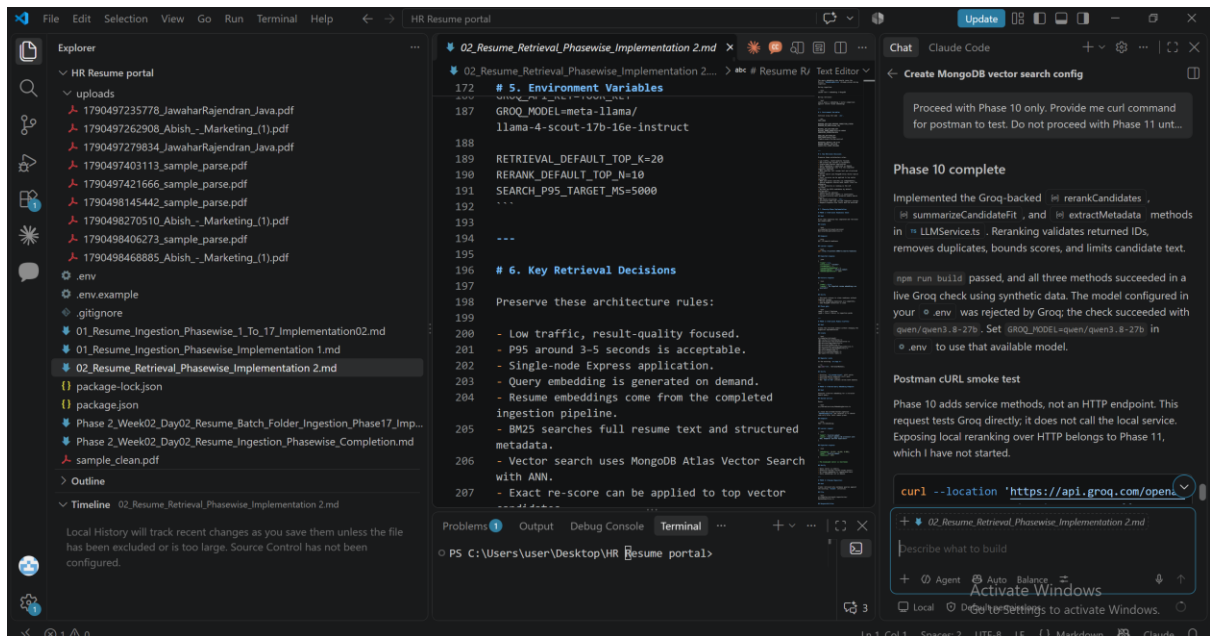

Phase 9 — Merge + Deduplicate Candidates

```
curl --location --request POST "http://localhost:3000/v1/search/hybrid-debug" \
--header "Content-Type: application/json" \
--data-raw '{
  "query": "SEO Manager",
  "topK": 5
}'
```

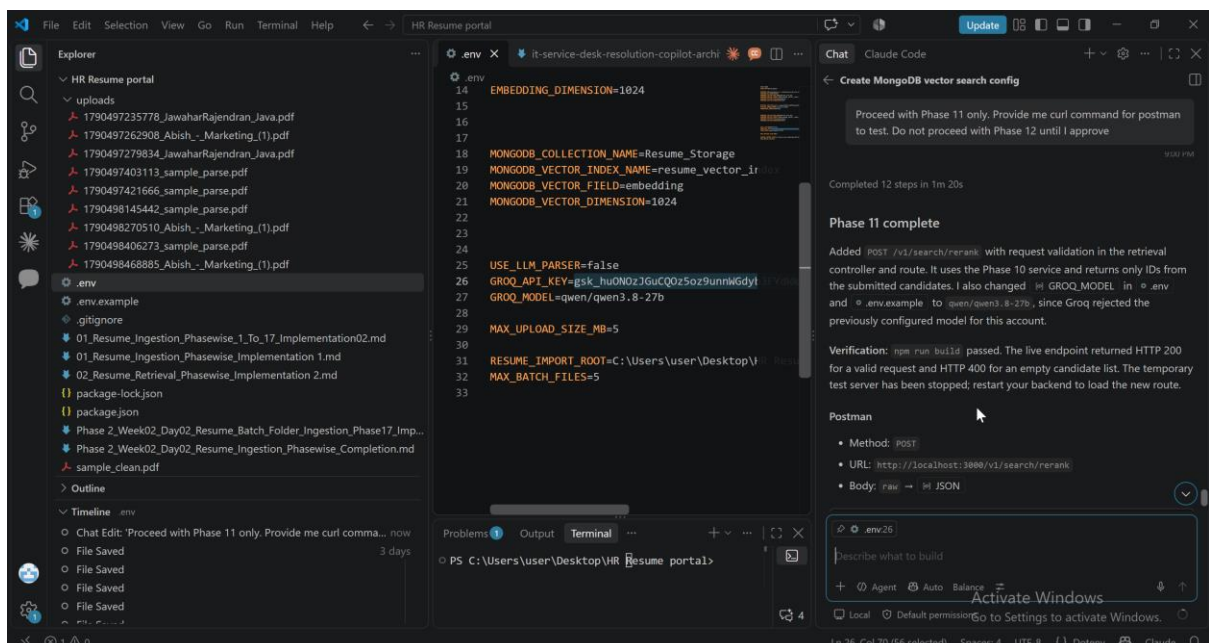

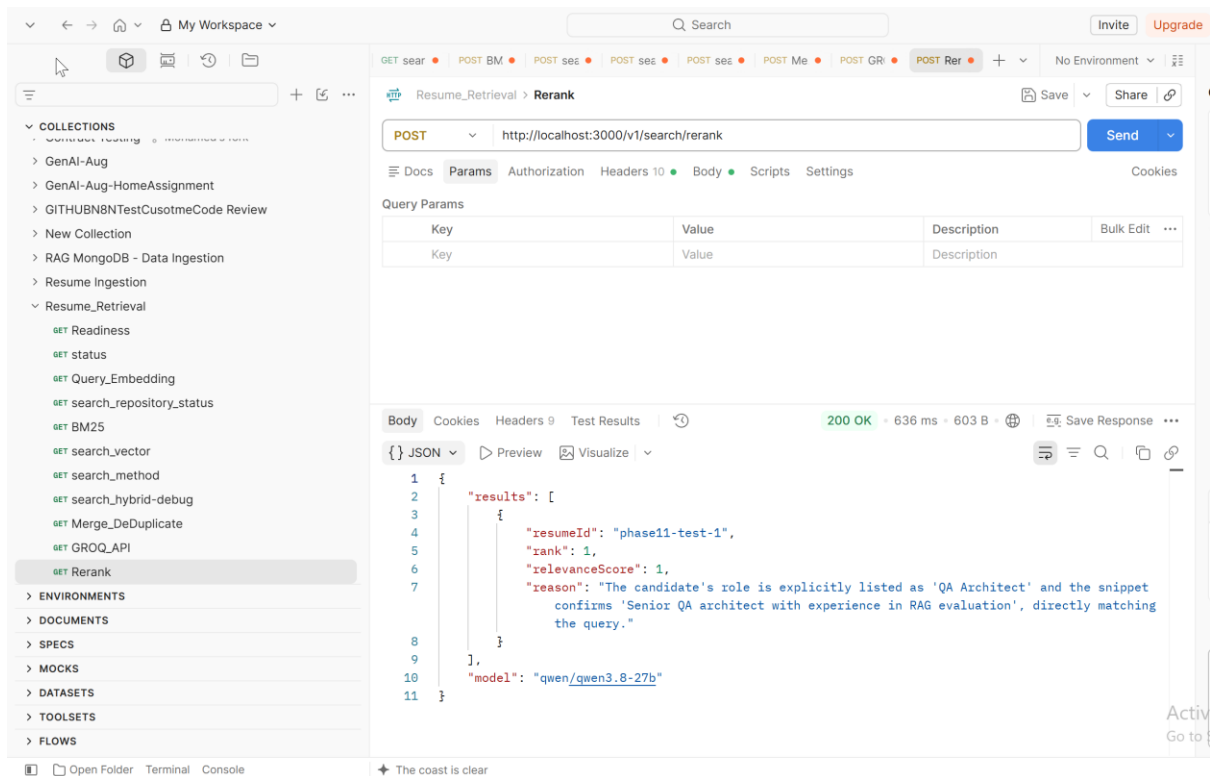

```
Phase 10 curl --location 'https://api.groq.com/openai/v1/chat/completions' \
--header 'Authorization: Bearer {{GROQ_API_KEY}}' \
--header 'Content-Type: application/json' \
--data-raw '{
  "model": "qwen/qwen3.8-27b",
  "temperature": 0,
  "max_tokens": 300,
  "response_format": { "type": "json_object" },
  "messages": [
    {
      "role": "user",
      "content": "Rank only these candidates for the query. Return JSON with a results array
containing resumeId, relevanceScore from 0 to 1, and reason. Query: Senior QA architect with RAG
evaluation. Candidates: [{\"resumeId\": \"phase10-test-1\", \"role\": \"QA
Architect\", \"skills\": [\"RAG\", \"DeepEval\"], \"snippet\": \"Senior QA architect with RAG evaluation
experience.\"}]"
    }
  ]
}'
```

Phase 11 Re-Ranking

```
curl --location 'http://localhost:3000/v1/search/rerank' \
--header 'Content-Type: application/json' \
--data-raw '{
  "query": "Senior QA architect with RAG evaluation",
  "candidates": [
    {
      "resumeld": "phase11-test-1",
      "name": "Alex Example",
      "role": "QA Architect",
      "skills": ["RAG", "DeepEval"],
      "snippet": "Senior QA architect with experience in RAG evaluation, DeepEval, and enterprise governance."
    }
  ],
  "topK": 1
}'
```

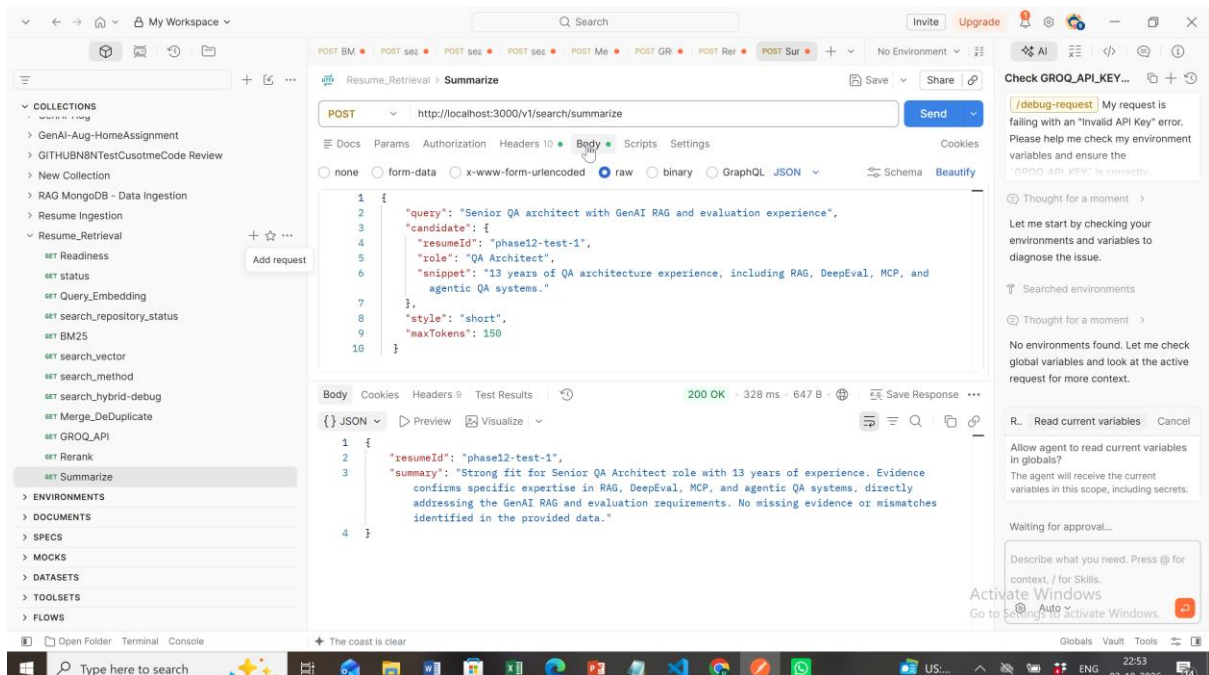

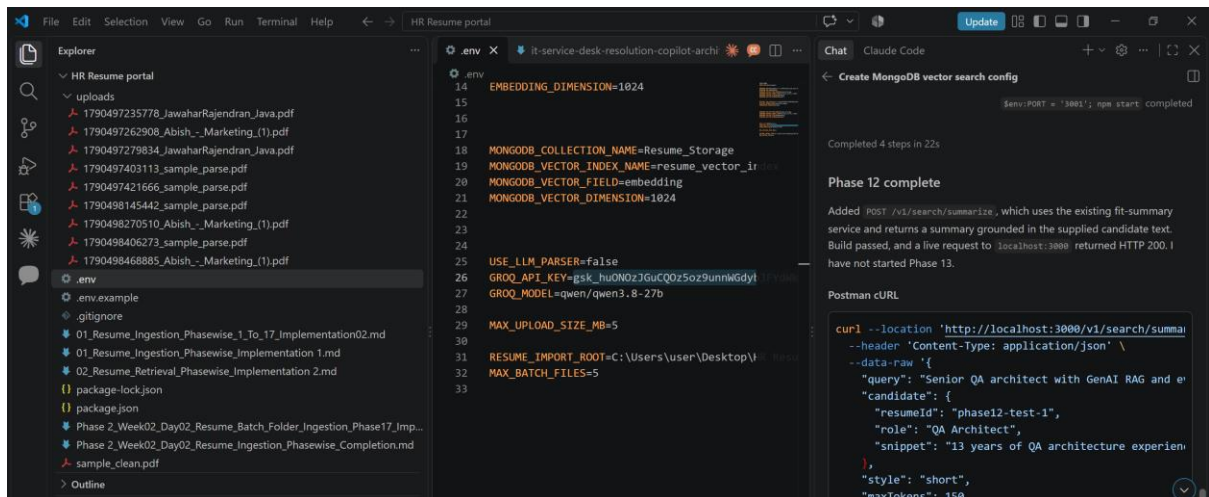

```

Phase 12 curl --location 'http://localhost:3000/v1/search/summarize' \
--header 'Content-Type: application/json' \
--data-raw '{
  "query": "Senior QA architect with GenAI RAG and evaluation experience",
  "candidate": {
    "resumeId": "phase12-test-1",
    "role": "QA Architect",
    "snippet": "13 years of QA architecture experience, including RAG, DeepEval, MCP, and agentic
QA systems."
  },
  "style": "short",
  "maxTokens": 150
}'

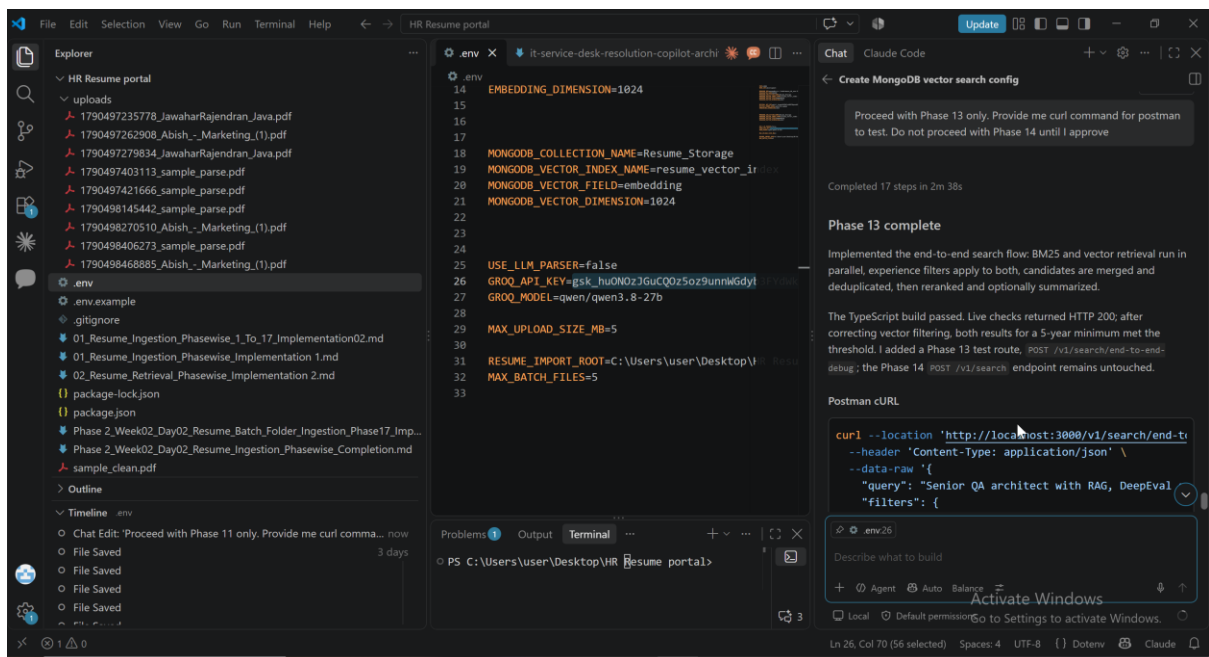

```

Phase 13 Implemented the end-to-end search flow: BM25 and vector retrieval run in parallel, experience filters apply to both, candidates are merged and deduplicated, then reranked and optionally summarized.

```
curl --location 'http://localhost:3000/v1/search/end-to-end-debug' \
--header 'Content-Type: application/json' \
--data-raw '{
  "query": "Senior QA architect with RAG, DeepEval and MCP",
  "filters": {
    "minYearsExperience": 5
  },
}
```

```
"options": {
  "bm25TopK": 5,
  "vectorTopK": 5,
  "rerankTopN": 3,
  "finalTopK": 2,
  "summarize": true,
  "summaryStyle": "short"
}
}'
```

Body

```
22 ],
23  "summary": "**Fit: Low**\n* **Mismatch:** The candidate is a Senior Testing Engineer with 8 years of experience focused on manual and automation testing (Selenium, API, SQL) within the BFSI domain. Their core expertise lies in test planning, defect management, and functional validation, not in building or engineering Retrieval-Augmented Generation (RAG) systems.\n* **Missing Evidence:** There is no evidence of experience with vector databases, embedding models, LLM integration, or RAG pipeline architecture. While \"RAG\" is listed in the skills section, the resume provides no context, project details, or technical depth to verify this skill, and the rest of the profile strongly indicates a traditional QA role.\"
24 },
25 {
26   "rank": 2,
27   "resumeId": "6abd4d844f0198c9b05da221",
28   "name": "C Priyanka",
29   "role": "QA Engineer",
30   "company": null,
31   "totalExperience": 5
32 }
```

Phase 15 Implemented graceful handling for BM25, vector search, reranking, and summarization failures. If both retrieval methods fail, the endpoint returns HTTP 503 with SEARCH_UNAVAILABLE

```
curl --location 'http://localhost:3000/v1/search' \
--header 'Content-Type: application/json' \
--data-raw '{
  "query": "RAG QA engineer",
  "filters": {
    "minYearsExperience": 5
  },
  "options": {
    "bm25TopK": 5,
    "vectorTopK": 5,
    "rerankTopN": 3,
    "finalTopK": 2,
    "summarize": true,
    "summaryStyle": "short"
  }
}'
```

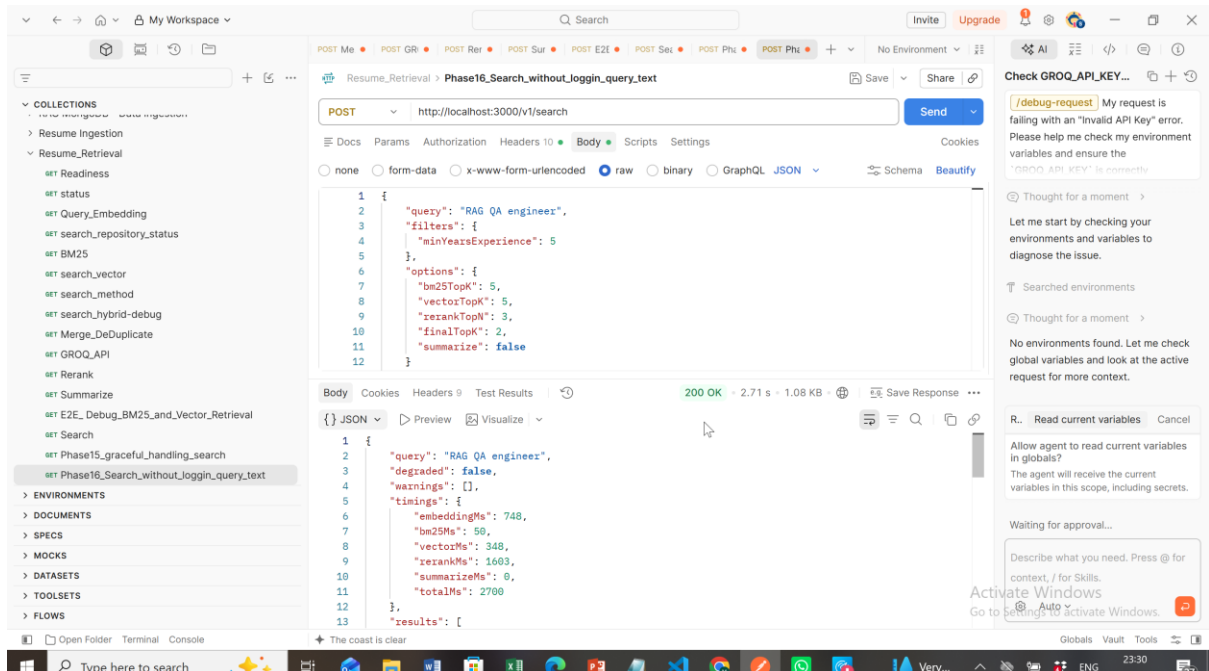

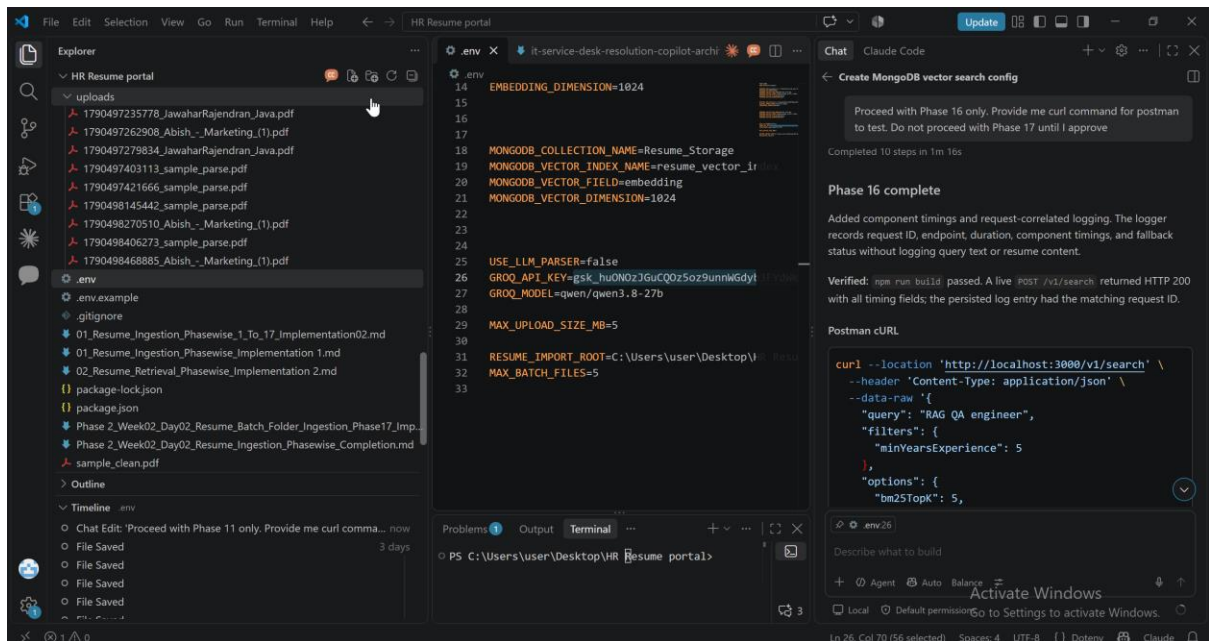

Phase 16 Added component timings and request-correlated logging. The logger records request ID, endpoint, duration, component timings, and fallback status without logging query text or resume content.

```

curl --location 'http://localhost:3000/v1/search' \
--header 'Content-Type: application/json' \
--data-raw '{
  "query": "RAG QA engineer",
  "filters": {
    "minYearsExperience": 5
  },
  "options": {
    "bm25TopK": 5,
    "vectorTopK": 5,
    "rerankTopN": 3,
    "finalTopK": 2,
    "summarize": false
  }
}'

```

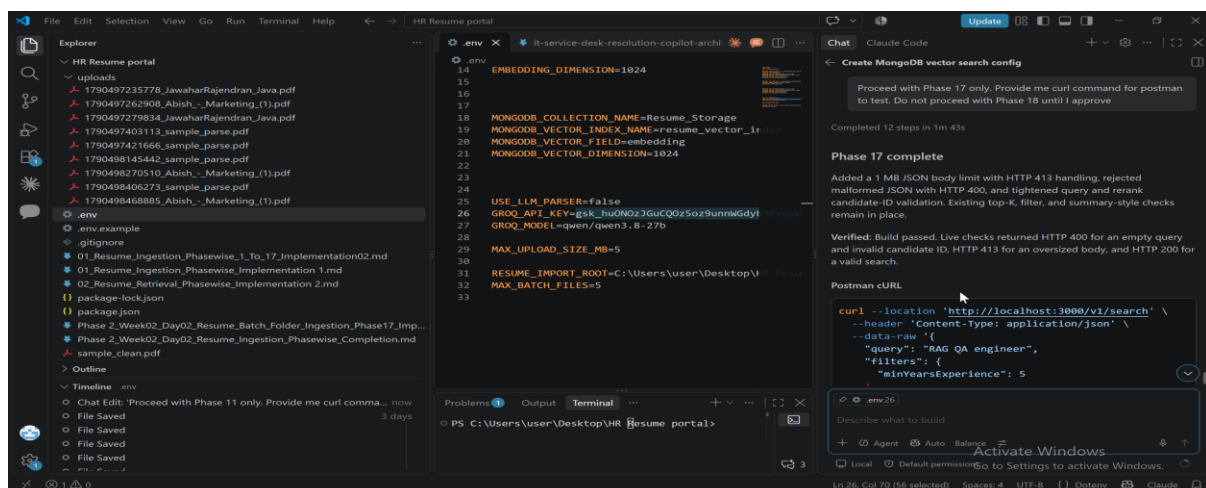

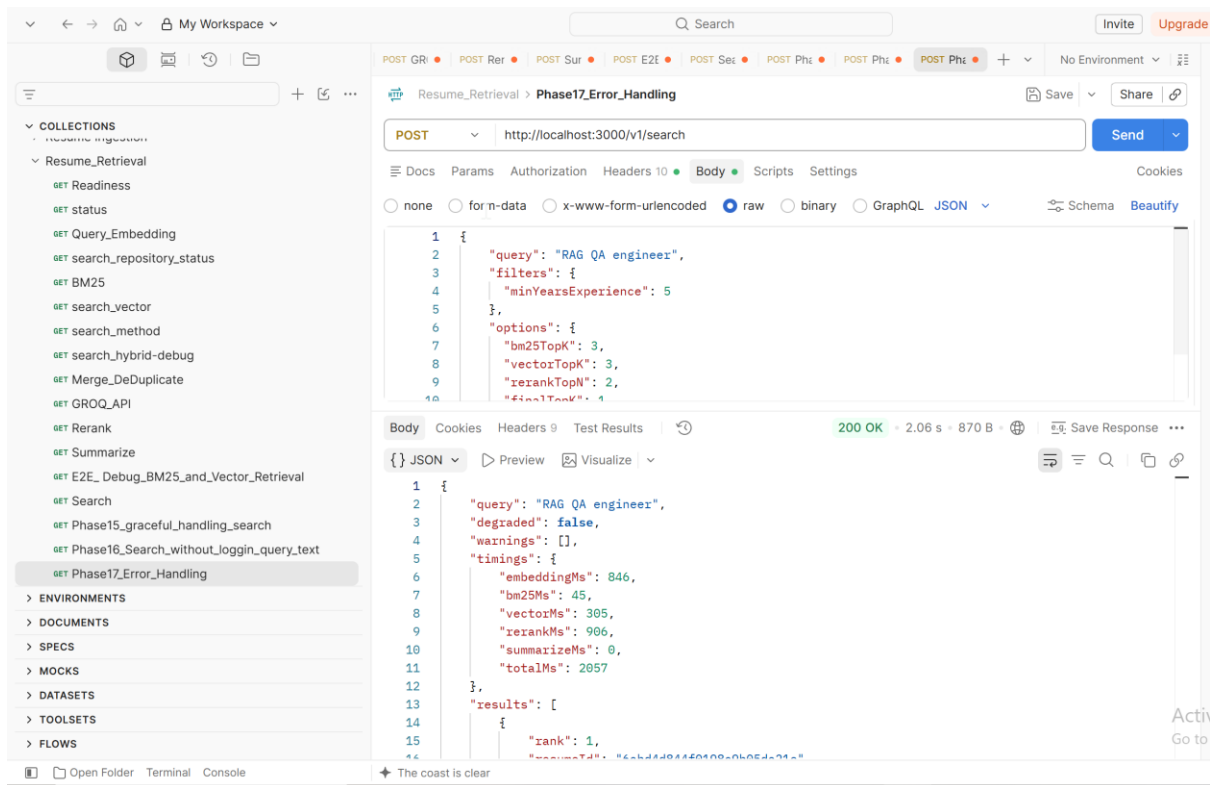

The response now includes timings for embedding, BM25, vector search, reranking, summarization, and total time. Values vary by request.

Phase 17 Added a 1 MB JSON body limit with HTTP 413 handling, rejected malformed JSON with HTTP 400, and tightened query and rerank candidate-ID validation. Existing top-K, filter, and summary-style checks remain in place.

Verified: Build passed. Live checks returned HTTP 400 for an empty query and invalid candidate ID, HTTP 413 for an oversized body, and HTTP 200 for a valid search.

```
curl --location 'http://localhost:3000/v1/search' \  
--header 'Content-Type: application/json' \  
--data-raw '{  
  "query": "RAG QA engineer",  
  "filters": {  
    "minYearsExperience": 5  
  },  
  "options": {  
    "bm25TopK": 3,  
    "vectorTopK": 3,  
    "rerankTopN": 2,  
    "finalTopK": 1,  
    "summarize": false  
  }  
'
```

Phase 18

Added retrieval unit and HTTP integration tests in retrieval.test.js. The tests cover candidate mapping/deduplication, BM25 and vector result normalization, rerank output validation, fallback ordering, retrieval endpoints, and request validation.

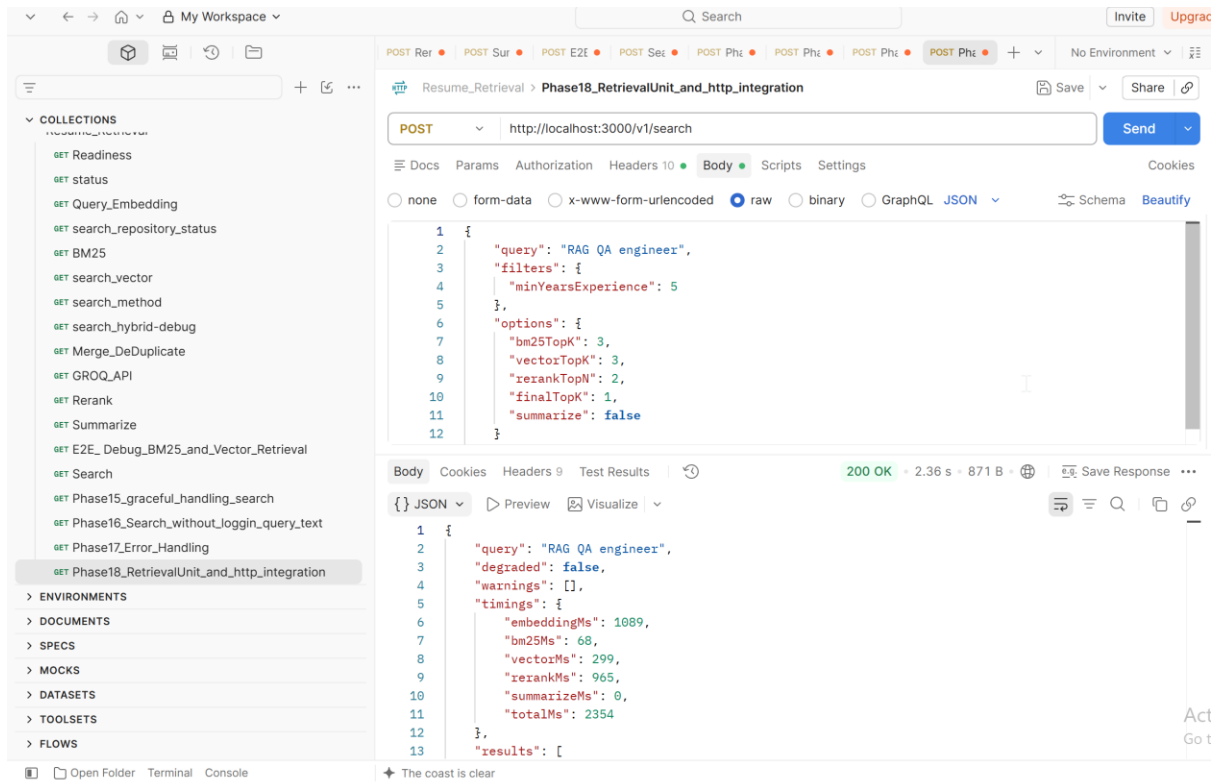

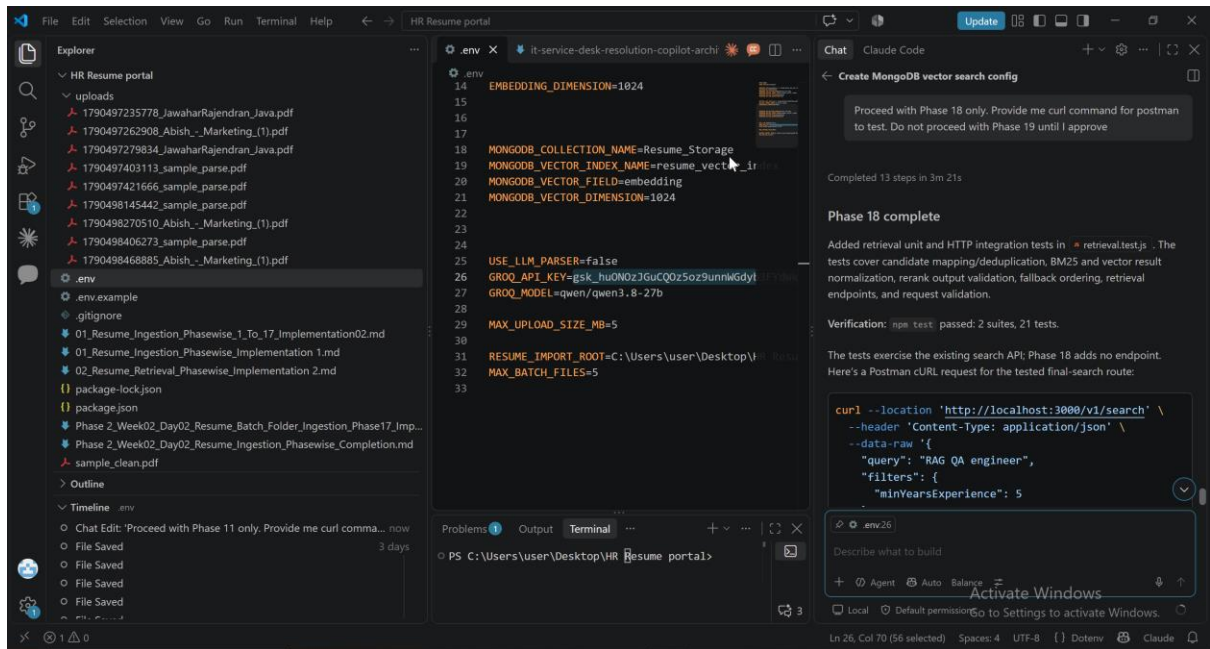

```

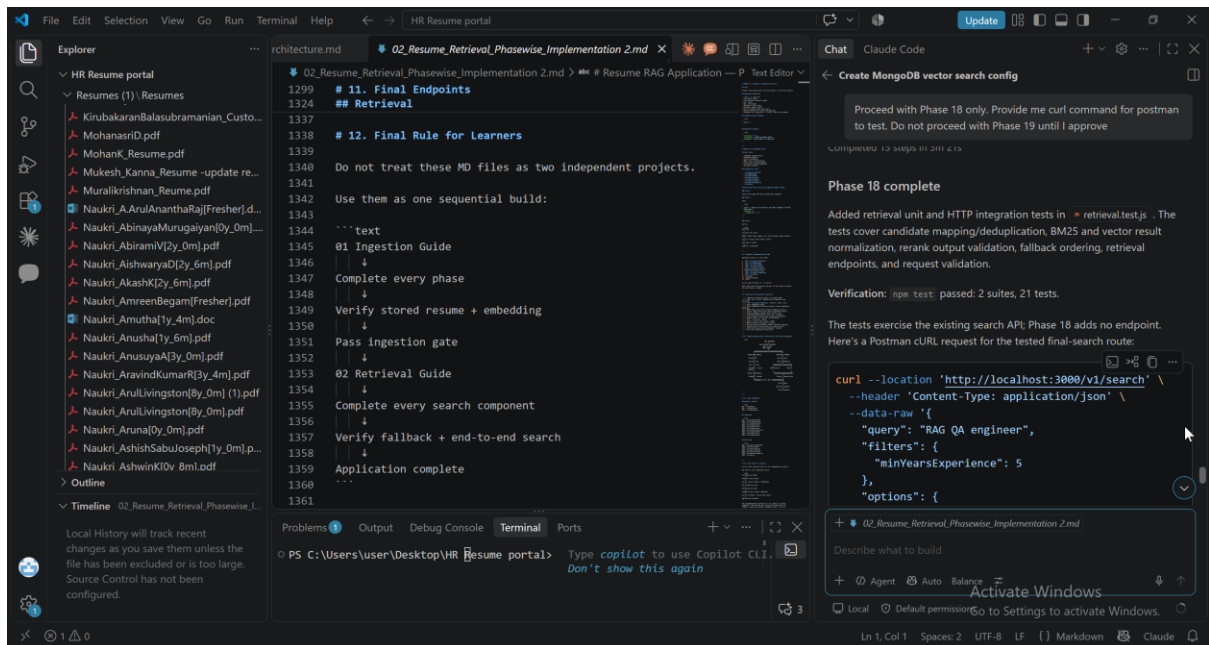

curl --location 'http://localhost:3000/v1/search' \
--header 'Content-Type: application/json' \
--data-raw '{
  "query": "RAG QA engineer",
  "filters": {
    "minYearsExperience": 5
  },
  "options": {
    "bm25TopK": 3,
    "vectorTopK": 3,
    "rerankTopN": 2,
    "finalTopK": 1,
    "summarize": false
  }
}'

```

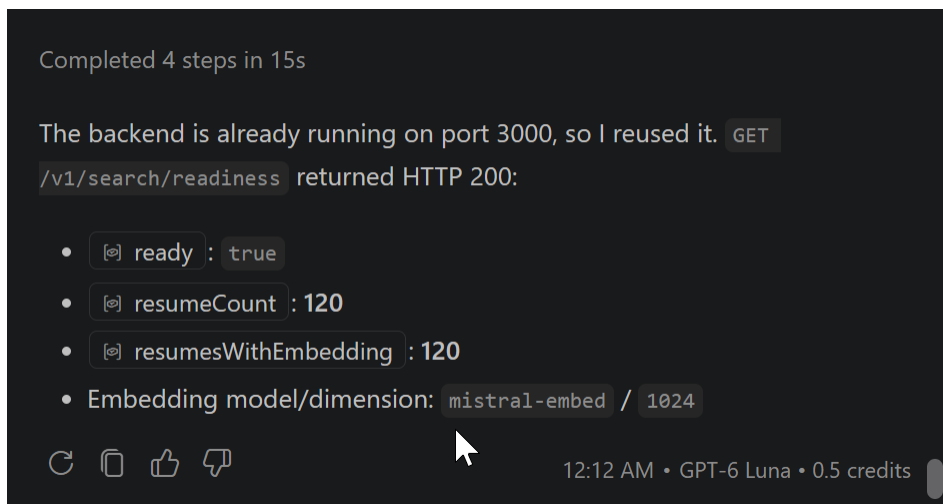

}

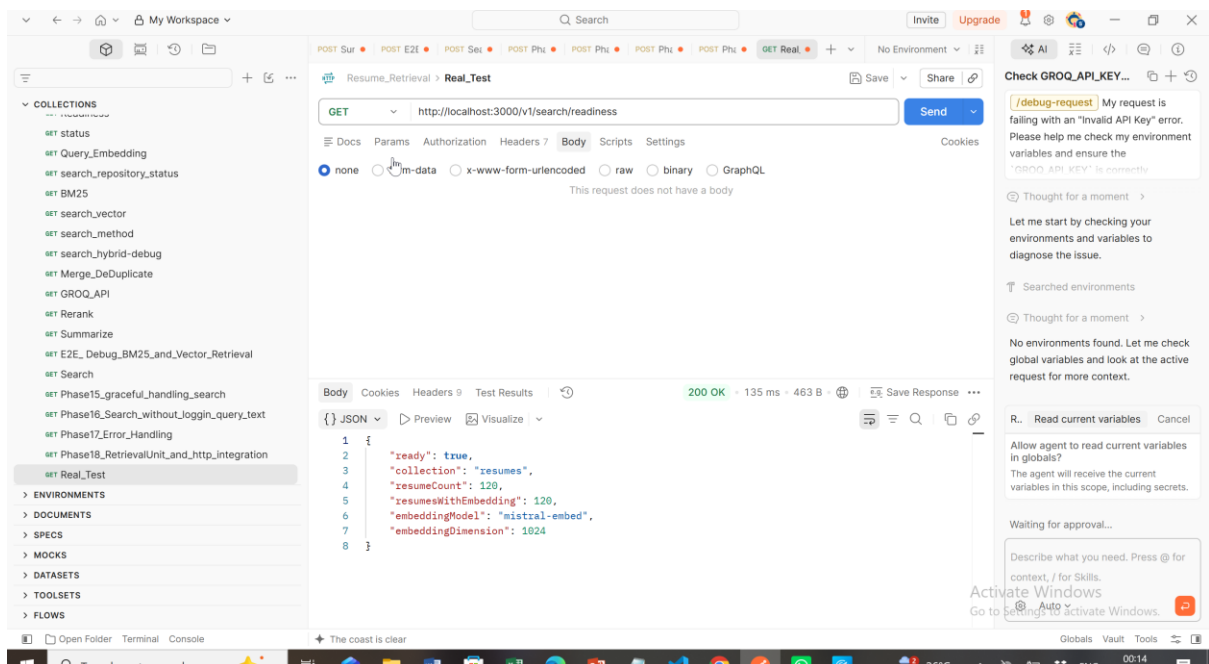

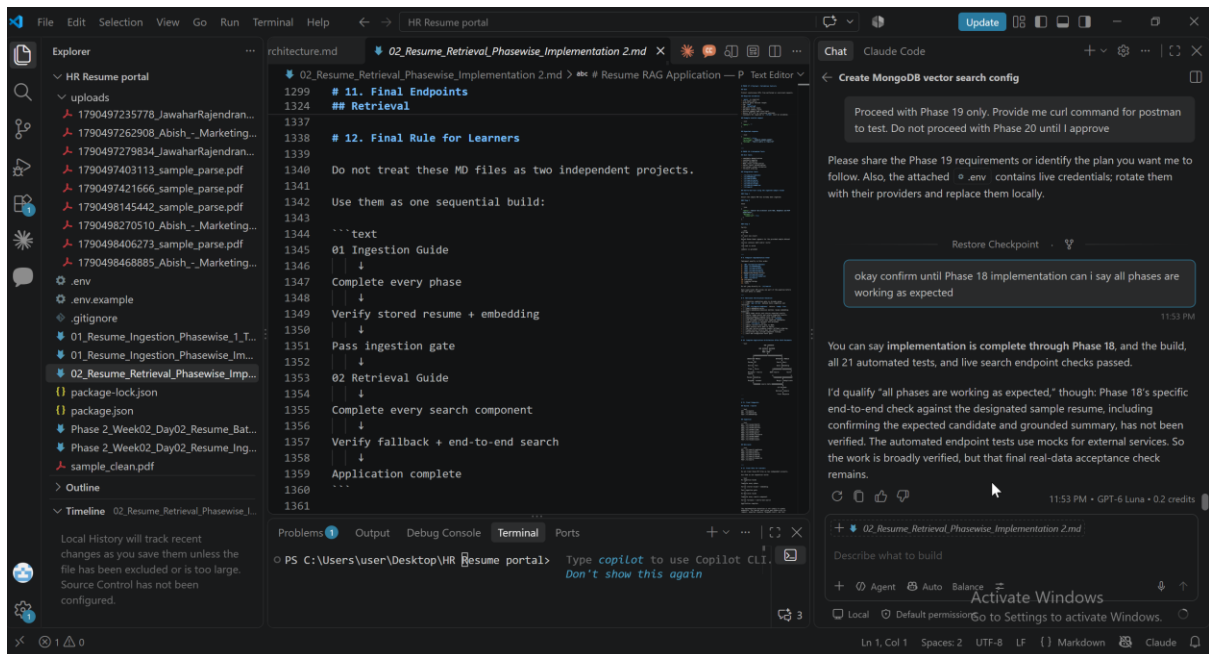

'
