Debugging Resume CL...

The request to http://localhost:3000/v1/resume/clean is returning a 404 Not Found error. Please help me identify the correct endpoint path or configuration to resume data.

The server's response confirms this: "Route not found" — the route GET /v1/resume/clean simply doesn't exist; only POST /v1/resume/clean does.

Let me fix the method on Phase6_Resume_Clean right now.

Tool call rejected: The request already matches the proposed values, so nothing was changed. Do not retry this edit; read the request first if you need its current state.

Phase 15 tested

The screenshot shows the Postman interface with a collection named 'Resume' selected. The 'Health' endpoint is highlighted. The request is a GET method to 'http://localhost:3000/v1/health'. The 'Authorization' tab is active, showing 'No Auth'. The response is a 200 OK status with a response time of 6 ms and a body size of 399 B. The response body is a JSON object:

```
{
  "status": "ok",
  "app": "resume-rag-backend",
  "version": "1.0.0",
  "uptime": 162844.6
}
```

The interface also shows a sidebar with various collections and environments, and a 'New Chat' button on the right.

Phase 16

The screenshot shows the Postman interface with a collection named 'Resume' selected. The 'Health' endpoint is highlighted. The request is a GET method to 'http://localhost:3000/v1/health'. The 'Authorization' tab is active, showing 'No Auth'. The response is a 200 OK status with a response time of 6 ms and a body size of 399 B. The response body is a JSON object:

```
{
  "status": "ok",
  "app": "resume-rag-backend",
  "version": "1.0.0",
  "uptime": 162844.6
}
```

The interface also shows a sidebar with various collections and environments, and a 'New Chat' button on the right.

Phase 16 MissingFileError Test

The screenshot shows the Postman interface for a test named "Phase 16_MissingFileError_Test". The request is a POST to "http://localhost:3000/v1/resume/ingest". The "Body" tab is selected, showing "none" as the content type. The response is a "400 Bad Request" with a status of 6 ms and 462 B. The JSON response is as follows:

```
{
  "success": false,
  "requestId": "762021c5-66c5-49d0-b9c2-f2915eca2d88",
  "errorCode": "FILE_REQUIRED",
  "message": "Resume PDF is required"
}
```

The left sidebar shows a collection of tests under "Resume", with "Phase 16_MissingFileError_Test" selected.

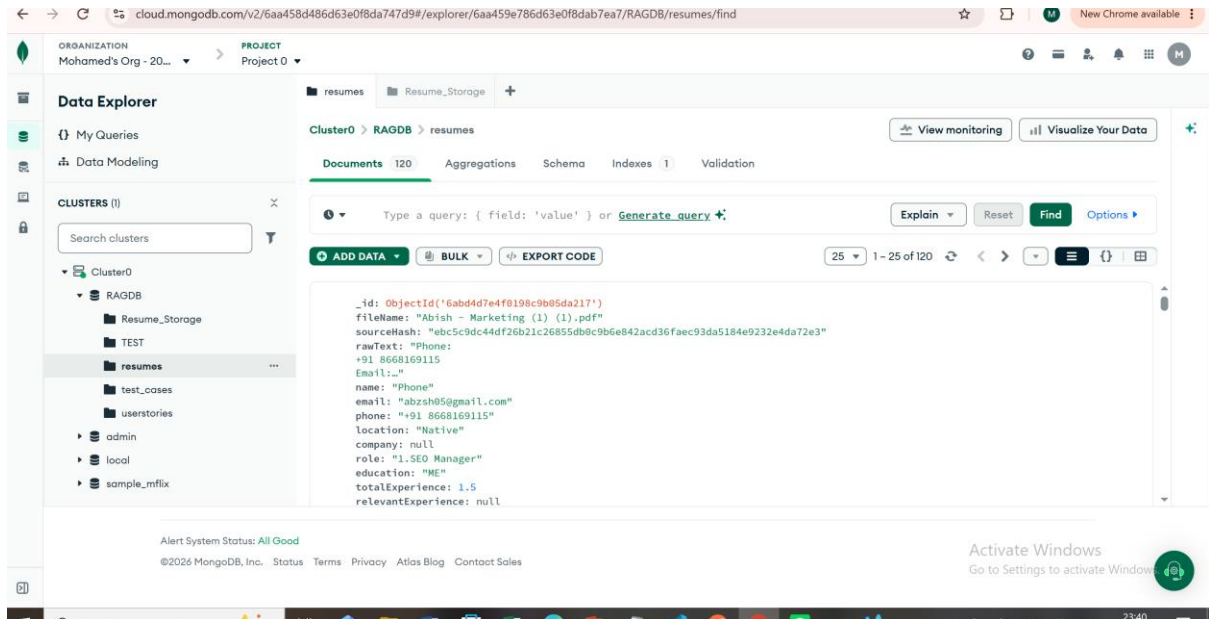

Phase 16 Ingest_Full_Integration_Test

The screenshot shows the Postman interface for a test named "Phase16_FullIngestion_Integration_Test". The request is a POST to "http://localhost:3000/v1/resume/ingest" with the "form-data" content type. A file named "ARUNJUNA KUMAR_Java.pdf" is attached. The response is a "200 OK" with a status of 2.76 s and 757 B. The JSON response is as follows:

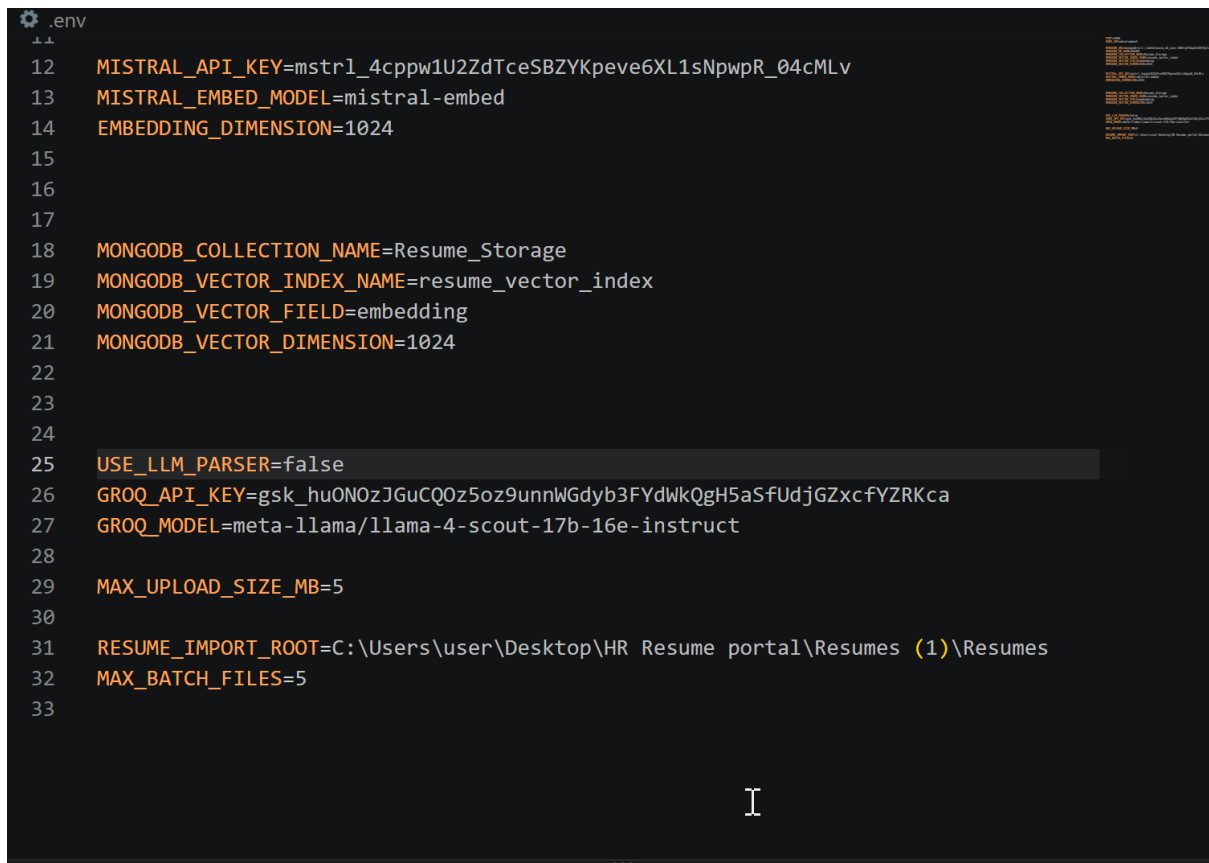

```
{
  "success": true,
  "message": "Resume ingestion completed",
  "resumeId": "6abd1f917e21e2ae57063fb7",
  "data": {
    "name": "Azunjunai Kumar",
    "role": "Software Engineer",
    "company": "Developed a comprehensive Insurance Management System using Spring",
    "totalExperience": 4,
    "skillsCount": 2,
    "embeddingModel": "mistral-embed",
    "embeddingDimension": 1024
  }
}
```

The left sidebar shows a collection of tests under "Resume", with "Phase16_FullIngestion_Integration_Test" selected.

I created a new Phase 17 which helped to ingest all resumes excluding non-pdf files, skipping duplicate resumes
