POLICY
1. Purpose and Scope
This policy outlines the guidelines and procedures governing various types of leave available to all full-time employees. The company believes that balance between professional and personal life is essential for productivity and well-being.
2. Annual Paid Time Off (PTO)
All full-time employees accumulate PTO at a rate of 1.67 days per month, resulting in a total of 20 days per calendar year.
- PTO requests must be submitted at least 5 business days in advance for approval by the department manager.
- A maximum of 5 unused PTO days may be carried over to the next calendar year. Any additional unused days will expire.
3. Sick Leave
Employees receive 10 paid sick days per year on January 1st. Sick leave is intended for personal illness, medical appointments, or caring for immediate family members.
- If sick leave exceeds 3 consecutive days, a certified medical note from a qualified physician is required.

Teaching Mode
Recursive Character Chunking
Splits text by a hierarchical list of characters (typically paragraphs '\n\n', single newlines '\n', spaces ' ', and empty strings ''). It aims to keep paragraphs and sentences intact as much as possible.
Overview
Applications
Practices
Q&A Prep
Advantages
Maintains natural reading structures like paragraphs and sentences.
Highly customizable splitting hierarchies.
Industry standard baseline for text document preprocessing.
Disadvantages
Chunk size can fluctuate based on text formatting.
Still limited to character/token limits without evaluating meaning.
Struggles with heavily structured tabular data.
Why Companies Use It
The standard default choice for most text documents.
Keeps paragraphs and sentences whole to preserve natural reading flow.
Requires zero machine learning setup or API keys.

Dynamic Hierarchy Preservation
Why is Recursive better than Fixed?
Fixed-size chunking slices text strictly by character length, which frequently splits words (e.g., comput-er) and cuts sentences in half. Recursive chunking uses a hierarchical fallback system: it attempts splits on paragraphs first, then lines, then word spaces. This ensures word boundaries are never broken and sentences remain complete inside chunks.
Why is Recursive STILL not Semantic?
While recursive chunking preserves structural text segments (like paragraphs and lines), it does not analyze the semantic meaning or content transitions of sentences. If a single topic spans across paragraphs, recursive splitting might partition them into separate chunks purely based on size limits, whereas Semantic Chunking evaluates topic embedding similarities to group related paragraphs coherently.
